GAYATHRI TIRUMALA - Software Engineer

California, USA

F-1 OPT (STEM OPT eligible) | Open to Relocation | Available Immediately

Phone: +1 (913) 387-9970 | Mail: tirumalagayathri2002@gmail.com | <https://www.linkedin.com/in/t-gayathri>

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building Python applications, cloud-based data pipelines, and REST APIs. Strong background in Google Cloud Platform, SQL, and backend development. Passionate about building scalable systems, improving data workflows, and solving real-world engineering problems. Known for strong learning ability, adaptability, and efficient use of AI tools to accelerate development and problem solving.

CORE SKILLS

Languages: Python, Java, SQL, JavaScript, HTML, CSS

Backend & Frameworks: Spring Boot, REST APIs, React (basic)

Cloud & Data: Google Cloud Platform (BigQuery, Dataflow, Pub/Sub, Cloud Storage), AWS

Data Libraries: Pandas, NumPy, Matplotlib, Seaborn

Tools: Git, Linux, Jira, Salesforce, Agile/Scrum

Concepts: OOP, Data Structures, SDLC, ETL Pipelines, API Development, Unit Testing, Debugging

EXPERIENCE HIGHLIGHTS

Software Engineer — Verizon Communications

- Built Python ETL pipelines to process large customer datasets and reduced manual data preparation time by ~60%
- Developed scalable workflows using Google Cloud Dataflow and BigQuery to process millions of records
- Wrote complex SQL queries for reporting and analytics
- Automated data ingestion and archival using Cloud Storage and Pub/Sub
- Improved pipeline reliability through testing, debugging, and peer code reviews

Software Engineer Intern — Incedo Inc

- Built Python automation scripts to improve data validation and reduce manual effort
- Performed exploratory data analysis using Pandas and SQL to identify trends and anomalies
- Developed cloud workflows using BigQuery and Cloud Storage
- Created documentation for data pipelines and validation processes

Graduate Software Engineering Projects

- Built secure cloud data sharing system using Attribute-Based Encryption and Python
- Developed full-stack doctor appointment booking application with authentication and scheduling logic
- Implemented backend services and REST APIs for an online course registration platform
- Tested applications using large, simulated datasets and collaborated in Agile teams

FREELANCE & INDEPENDENT WORK

- Completed freelance projects using AI-assisted development and vibe coding
- Performed database migration and automation tasks
- Strong prompt engineering skills and efficient use of AI tools for debugging, research, and productivity

EDUCATION

Master of Science in Computer Science

University of Central Missouri — GPA: 3.7

Bachelor of Technology in Computer Science & Engineering

IARE Hyderabad — CGPA: 8.44

CERTIFICATION

Google Cloud Associate Cloud Engineer (ACE)

CAREER GOAL

Seeking full-time opportunities as a **Software Engineer or Relevant positions** where I can contribute, learn continuously, and grow as part of a strong engineering team.
