Work Authorization: F-1 OPT (STEM OPT eligible)

Dear Hiring Manager,

I am writing to express my interest in this at your Company. With around 4 years of hands-on experience building backend systems, ETL pipelines, and SQL-driven data workflows across fintech and healthcare and a Google Cloud Associate Cloud Engineer (ACE) certification I am confident I can contribute meaningfully to your team from day one.

In my current role at Fifth Third Bank, I engineer and maintain production backend APIs and automated data pipelines that support core banking operations including accounts, fund transfers, and transaction processing. I specialize in PostgreSQL query optimization redesigning indexes and analyzing execution plans to reduce latency across critical data flows while enforcing data integrity through structured validation and error handling. Prior to this, at Mayo Clinic Healthcare, I built ETL pipelines that cut report generation time from 4 hours to under 30 minutes, and developed SQL schemas for healthcare claims and eligibility systems in compliance with HIPAA standards.

Earlier in my career at Cybage Software, I reduced data retrieval times by 25–30% through SQL index tuning and join restructuring, designed scalable data processing workflows with Python and Pandas, and integrated multiple third-party data sources into production pipelines. Across all roles I have applied strong data modeling fundamentals relational schema design, normalization, and data relationship management to build systems that are reliable, maintainable, and built to scale.

I hold a Master of Science in Computer Science from the University of Central Missouri (GPA 3.7), with coursework in Advanced Database Systems, Cloud Computing, and Software Testing. My GCP ACE certification reflects my commitment to cloud-native data engineering, and my background across both regulated industries banking and healthcare means I understand what it takes to build data systems that are not just functional but trustworthy.

I would welcome the opportunity to discuss how my background aligns with your team's needs. Please feel free to reach out at (913) 387-9970 or tirumalagayathri2002@gmail.com. Thank you for your time and consideration I look forward to speaking with you.

Sincerely,

Gayathri Tirumala
